Haiken

Office furniture engineered for inspiring workplaces

Haiken was founded to change the way people think about office furniture.

Founded by office furniture experts who wanted to provide better solutions for their customers, Haiken was born from a simple idea. That idea of raising the standard became part of our journey and it's something we repeat every time we look at a piece of furniture. It's the Haiken way.

We're on a mission to redefine how people think about office furniture. Founded by industry experts who aspired to offer value without sacrificing quality. Haiken are all about providing furniture that not only looks great, but helps make your workspace truly flexible and productive.

Visit our website at: www.haiken.com

Showroom

Haiken's showroom is situated at 121-131 Rosebery Avenue, Clerkenwell London, EC1R 4RF.

In the bustling design hub of London, we've set up a 2-storey space to showcase our furniture range in inspirational workplace environments. Please get in touch with the team to arrange a visit, by appointment only.

Seating

Follow Me

by Haiken

A minimal seating unit with a height of 460mm and a diameter of 400mm, combining simple design with comfortable structure. The Follow Me pouffe conveys a geometric movement into space by bringing together angular or linear, two different forms within one structure. Follow Me can be moved easily thanks to its leather handle extending through the module.

Gibbs

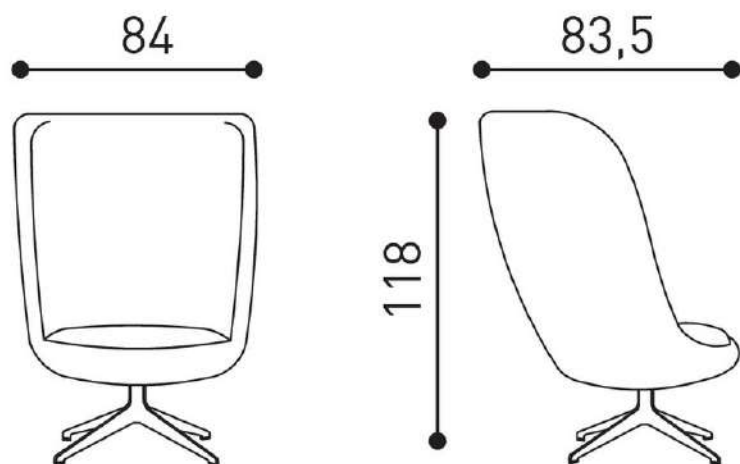

by Haiken

Due to its iconic design, the Gibbs chair will bring a distinct statement to every space thanks to its eye-catching curved outline. The Gibbs chair comes in a variety of colours and different leg options for you to choose from. Gibbs was named after one of Britain's most influential architects, James Gibbs (1682-1754). Gibbs was strongly influenced by the work of Sir Christopher Wren, who was also an early supporter of Gibbs. Hence why we named the Gibbs chair after him, as the Gibbs chair takes inspiration from our Wren chairs with an obvious difference being its extended back.

Hull

by Haiken

The Hull armchair offers a feeling of softness and comfort with its curved back structure and smooth appearance, offering an ergonomic and comfortable sitting experience thanks to the body and the back design that surrounds the user. With the headrest option, Hull truly symbolises a minimalist design with ultimate comfort. Want to increase the comfort even more? You're in luck as the Hull chair is also available with pouffe.

Lasdun

by Haiken

The lightweight office chair Lasdun delivers in adaptability and can be used as task or meeting chair - a true multi-tasker. With a focus on being incredibly comfortable, the upholstery material of the Lasdun is specially selected elastic 'tech' mesh to offer optimal support and ease of movement. Our multi-tasking chair was inspired by no other than Denys Lasdun, who created one of the greatest multi-use buildings of London. The National Theatre building on the south bank, hosted a huge range of facilities and events from fine art to food and drinks. The Lasdun chair is a chair that can take on many roles, the same way that Lasdun's edifice can almost shapeshift to take on its many functions.

Soane

by Haiken

Our Soane meeting chair is the perfect addition to any modern workspace. Our Soane chair with its curved design is a homage to the impressive works of John Soane, a famous British Architect who contributed immensely to the Neo-Classical style of architecture. He soared to fame during his 45-year stint as an architect of the Bank of England, a building which had a widespread effect on commercial architecture. Another project Soane was involved in was with the alterations to the Palace of Westminster, where he added a curving arcade with an entrance leading to a courtyard. The Soane meeting chair exudes confidence with its strong lines that curve outwards, while offering maximum user comfort.

Stirling

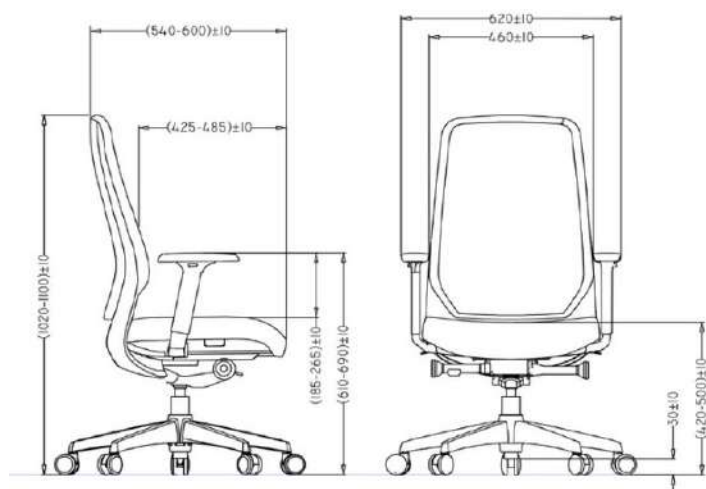

by Haiken

The Stirling chair is renowned for its lightness whilst also blending style and comfort. Specially created from sensitive foam, Stirling's seat moulds to every individual, providing incomparable user comfort. Haiken's Stirling task chair blends the aesthetic and the pragmatic. The creations and designs of James Stirling are some of the greatest examples of modernistic architecture which was applied with practical foresight. He worked on some of the most critical buildings of learning, governance and art, as the namesake of one of Haiken's bestsellers is only fitting. Stirling always looked for the blend of cutting edge design, style and usefulness and we believe this is exactly what the Stirling chair emulates.

Vanbrugh

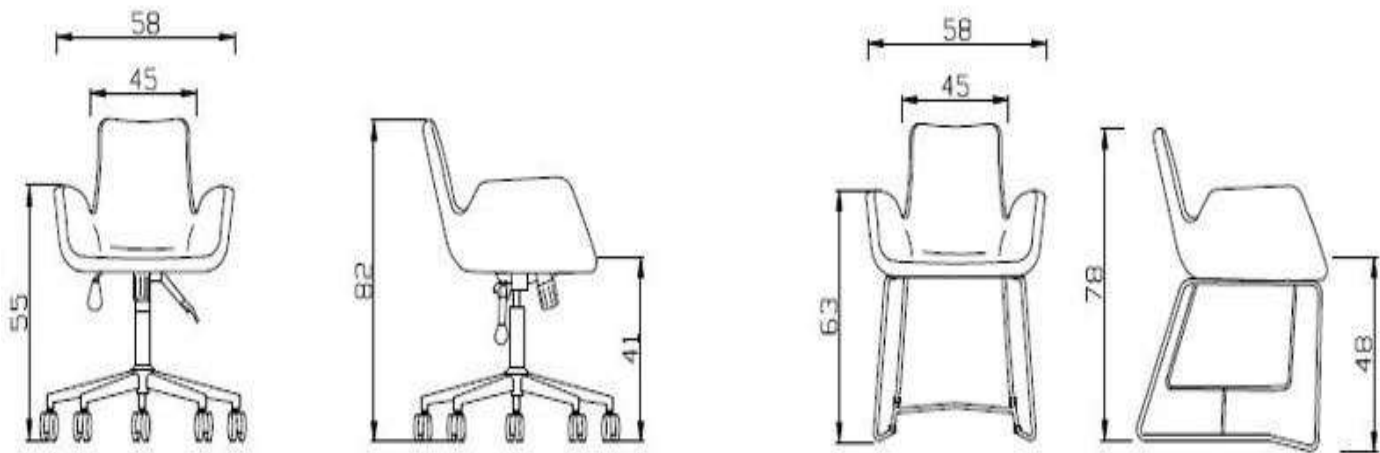

by Haiken

The Vanbrugh meeting chair is bold and daring, allowing you to decide the style thanks to Vanbrugh’s variety of different options. The chair has a swivel mechanism, with a striking black swiss base. Vanbrugh was inspired by no other than English Architect, John Vanbrugh, best known as the designer of the unique Blenheim Palace built between 1705 and 1722 and Castle Howard that began construction in 1701 and took 100 years to complete! Both were designed in the rare English Baroque style. Vanbrugh’s work was bold and daring which we felt our Vanbrugh chair emulates as it too has a unique style and shape.

Webb 1.0

by Haiken

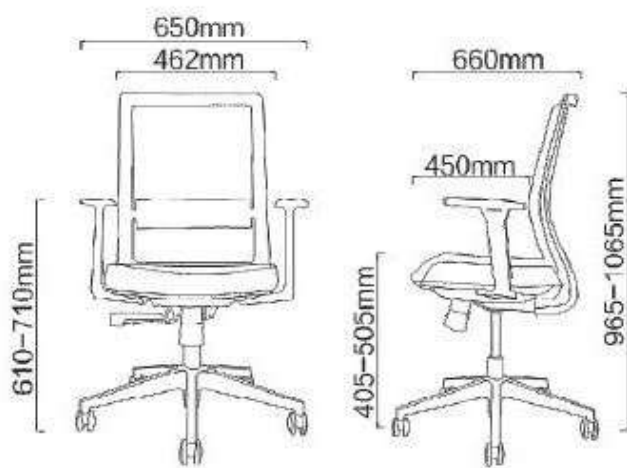

The Webb task chair has fast become an all-time favourite and is our go to choice for projects that need quality without breaking the bank. The Webb task chair is the perfect reliable all-rounder keeping the comfort of your workforce at the forefront. It features an excellent ergonomic design that is both supportive and comfortable with a breathable mesh backrest and 3D armrests. This emulates the idea that anything simple can be enhanced with clever design. So, who else to name them after other than Philip Webb, who’s designs were famously honest and were founded in the appreciation of common buildings and designs that could be elevated to an artistic standard.

Webb 2.0

by Haiken

As the Webb 1.0 has become an all-time favourite, Haiken has now launched the Webb 2.0. This task chair is an excellent choice for projects on a tighter budget but with the same ergonomic requirements. The Webb task chair is the perfect reliable all-rounder keeping the comfort of your workforce at the forefront. The Webb 2.0 has an excellent ergonomic design that is both supportive and comfortable with a seat slide, a 6-position lockable backrest and 3D armrests. The key difference from the original Webb, is that the Webb 2.0 features the addition of self-synchro mechanism making it easier to use as it automatically adjusts itself to the user's weight. Webb 2.0 has an 8 year warranty and is in stock for quick lead times!

Wren

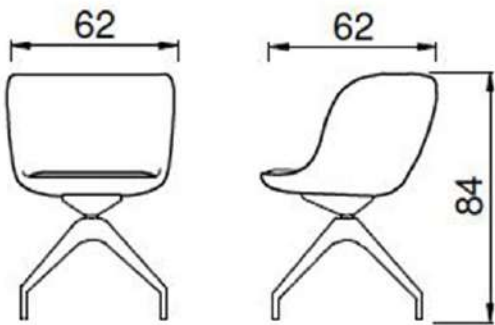

by Haiken

This meeting chair brings innovation and difference to every space thanks to its iconic design featuring different leg options. The Wren meeting chair is available with a striking black swiss base. This eye-catching curved seat was named after the most highly claimed English architect, Christopher Wren, who introduced the Baroque architecture style to England. His most impressive innovation was the beautifully curved St Paul's Cathedral completed in 1710, one of the most famous and most recognisable sights of London. St Paul's dome, framed by the spires of Wren's City churches has dominated the skyline for over 300 years and is timeless.

Pod

Scott

by Haiken

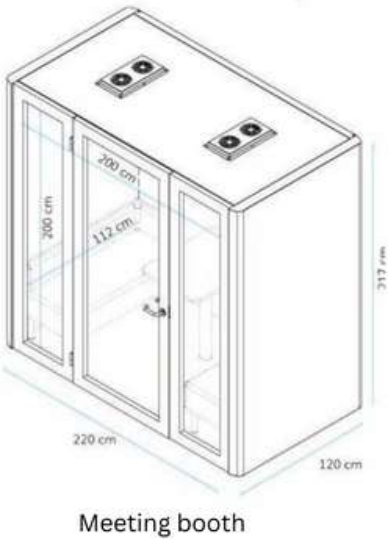

The acoustic Scott Meeting Pod can house 2-4 people, and is made from carefully selected materials that offer optimum sound absorption. Named after Sir Giles Gilbert Scott who designed one of the most well-known small spaces in the UK: the telephone box! Our Scott meeting pods provide an equally practical solution to create a private space for collaboration in open plan offices, whilst also adding a beautiful and highly ergonomic pod design. Haiken's Scott is energy efficient with sensor controlled lighting and full ventilation. If you outgrow your workspace or want to re-arrange the layout, the Scott Meeting Pod makes it easy as it's demountable and transportable - making it futureproof. Also available as a single pod.

Rietveld

by Haiken

Introducing Rietveld Shelving System - the epitome of functional and visually appealing modular storage. These versatile shelves offer easy organization, adaptability to any room, and come in wall-mounted, corner, and freestanding options with access from both sides. Perfect for offices, homes, and public places, Rietveld Shelving provides stability and customizable height options for all your storage needs. The Rietveld Shelving system pays homage to the renowned Dutch designer Gerrit Rietveld, a prominent figure in the De Stijl movement. Inspired by the art of Piet Mondrian, Rietveld's work embraced the same geometric style that defines the aesthetic of the Rietveld Shelving system. This connection to artistic heritage adds a touch of timeless elegance to these functional and visually appealing storage units.

Flexure

by Haiken

The Flexure desk was inspired by John Wood the Elder, the organic shape and elegance that his designs illustrate is what inspired us. The height-adjustable Flexure desk with its rounded legs and endless options for flexibility, provides the perfect desk designed for today but engineered for the workspace of tomorrow. With its telescopic frame and the option to add casters, the versatile Flexure is futureproof for the ever-changing demands in a growing workforce. The Flexure desk is easily adaptable by the option to adjust working positions based on different team members or work assignments. The almost inaudible motor operation ensures zero disturbance to surrounding colleagues. A shock-absorb feature between frame and table top mitigates any tremor transfer.

Gavina

by Haiken

Gavina enables different compositions coming side by side with its assembling elements. The desks are 700 deep and 740 high with a width of either 1200, 1400 or 1600. Corner modules can be added to create U-shape set ups. Gavina's folding structure makes the table easy to store when it is not needed. This flexibility makes Gavina the ideal meeting table for conferences, meeting rooms, classrooms, training seminars or boardrooms.

Rossi

by Haiken

Whether used as a workstation, a bench system, or a meeting table, the Rossi workstation should fit right in and bring a new brightness to any modern work environment. The desk is either 800 or 1640 deep with various widths available. Suited to open plan, meeting rooms, or executive suite; the flexible configuration means the Rossi desk provides a workstation wherever needed. Aldo Rossi was a man who understood the need to see any design or construction as one inspired by history and the wider world around it. His design style was one of multicultural inspiration and through the understanding of the context his designs excelled. Rossi's designs were all to do with being open and simple, and our Rossi desk perfectly reflects this openness with its durability and smooth functioning system.

Wolfe

by Haiken

The height-adjustable Wolfe desk is robust and offers maximum strength for a minimum weight. With its telescopic frame, the versatile Wolfe is futureproof for changing demands in a growing workforce. The almost inaudible motor operation ensures zero disturbance to surrounding colleagues. A shock-absorb feature between frame and table top mitigates any tremor transfer. Our clever four-height desk was inspired by the equally smart Sir John Wolfe Barry, one of the brains behind the Iconic Tower Bridge of London. The quiet yet fluid movement was driven by clever design and craft, which is precisely the spirit in which the Wolfe desk has been created - quiet, fluid and ingenious, if we do say so ourselves!

Wright Cowork Desk

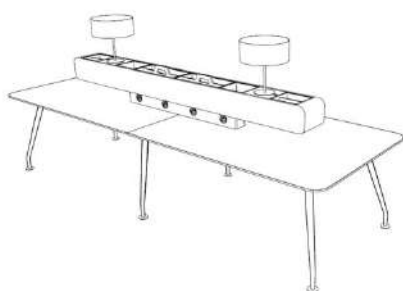

by Haiken

Introducing our new solution to an agile workspace: the Wright Co-work Desk! The Wright Cowork desk's flexibility makes it the perfect solution to tie into the new agile working environment, where colleagues can collaborate with ease. The sides can be adjusted to accommodate biophilia or simple storage space for stationary. The side of the higher desks also have the option for a screen to easily share visuals. The desk has built in lights and charging points. Wright Cowork Desk is named after Frank Lloyd Wright, an early inventor of the open space office. He destroyed the old idea of interior design that a room was enclosed by four walls by creating interiors that were defined rather than strictly enclosed.

Notre

by Haiken

Both natural and assertive, Notre is the ideal soft seating that will blend in with a variety of different designs. The Notre collection is named after André Le Nôtre, the famous French landscape architect and the principal gardener of King Louis XIV of France. In 1661 Louis XIV entrusted André Le Nôtre with the creation and enhancement of the gardens of Versailles, which he considered just as important as the Palace. What better person to name our outdoor set after a man with such an incredible passion for gardens and architecture.

Chair

Vaux

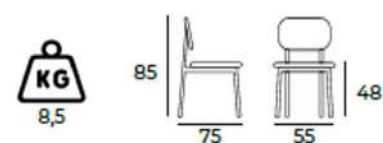

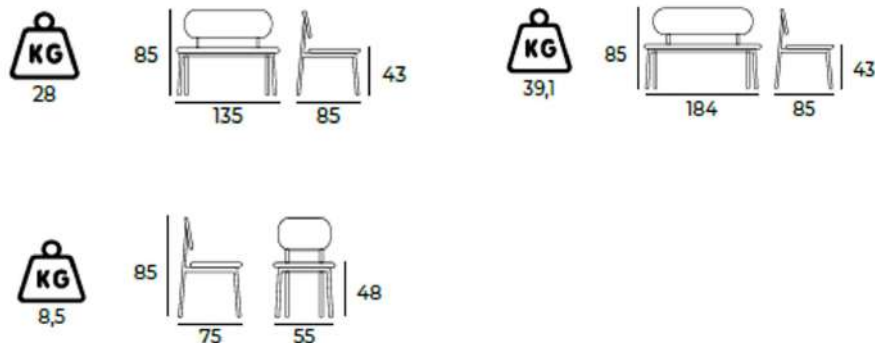

by Haiken

An outdoor design that takes its durability from its aluminium structure. The Vaux outdoor set was designed carrying the reflections of the Iroko tree - a large hardwood tree found in the west coast of tropical Africa. So there is little surprise as to why Vaux adds a tropical element to an outdoor setting. But where does Vaux get its name you may ask? Calvert Vaux was an English-American landscape architect who was known for his partnership with Frederick Olmsted. Together, they designed many of America's most famous public parks including the famous Central Park in New York City.

Seating

Algo

by Noti

Algo is a small armchair with curved, organic lines and an openwork design. Despite the seemingly delicate form, it is stable and comfortable to sit on. An additional advantage is that it occupies little space. Algo is available in two versions: beech plywood finished with oak veneer (with oak armrests, always in the colour of the veneer) and upholstered (with oak armrests). With a broad range of fabrics and finishing materials, Noti can make truly exceptional products. This collection is a perfect choice for public spaces (cafes, waiting rooms, hotel rooms and lobbies, offices) and private apartments (living rooms and bedrooms).

Banffy

by Noti

Our Banffy stool stands out for its playful form and a variety of colour versions. Inspired by a children's toy, the piece is made of variously sized discs stacked one on top of another. "The key advantage of the stool is its base which allows Banffy to follow the position of the user by inclining slightly, thus increasing the user's range of movement (maximum inclination: 12 degrees). In this way, Banffy makes you more alert, focused and concentrated. The stool meets the requirements of contemporary working spaces designed in accordance with the Activity Based Workplace concept. Users can work actively both sitting and standing at adjustable height desks. With its broad range of sitting height adjustment, the stool adapts easily to changing user needs: it can be a classic low stool or a standing desk chair. Banffy is an excellent choice for all home and office spaces. The piece was designed as part of the 19th edition of the Education and Design Programme co-organised with the University of the Arts in Poznań (UAP). Co-working space was the leitmotif of the Programme.

Belem

by Noti

Belem is a collection of modern bar stools that will fit in perfectly both in residential spaces and commercial areas such as hotels, restaurants and other food venues, and offices. Belem bar stools stand out with the unique lenticular shape of the seat with a concave surface ensuring a high level of user comfort. The stools are offered in two heights. 65 and 77 cm for version with wooden seat. 66 and 78 cm for version with upholstered seat. Thanks to a wide range of fabric and contract leather options, and a selection of wood colours, the bar stool will blend seamlessly with any type of interior. Designed by Piotr Kuchciński.

Bouli

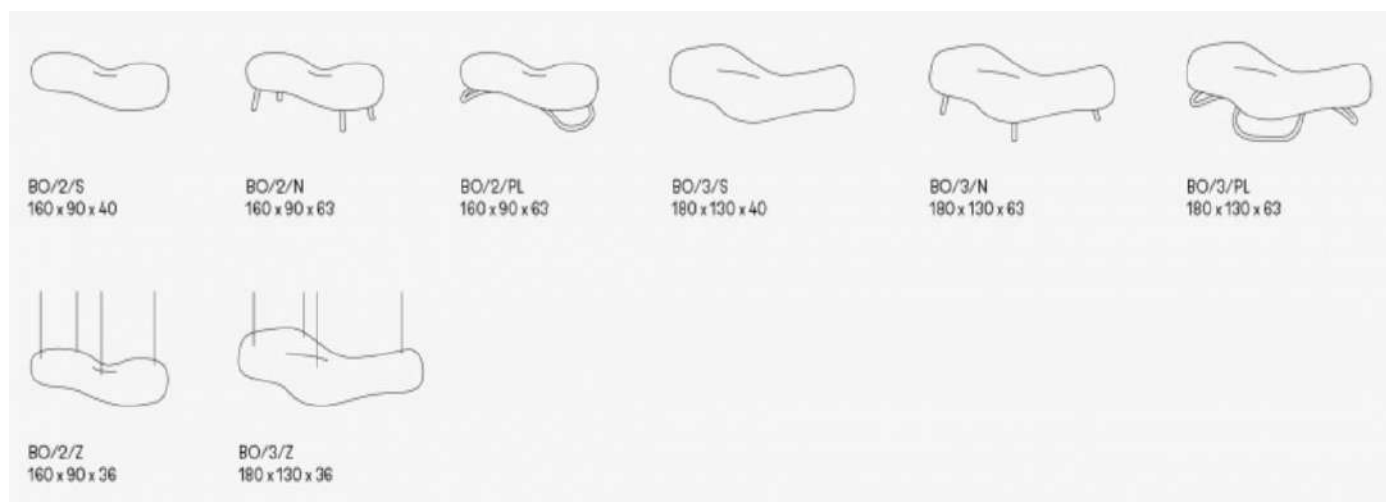

by Noti

Bouli is a family of uniquely designed and exceptionally comfortable sofas with irregular, oval shapes. Varied seating surface invites the user to relax in the most comfortable position. A highlight of the design is the possibility to choose a base from a range of options with different functionalities and aesthetic qualities determining the final form of the furniture. The seats can be fixed on wooden legs or metal skids. Equipped with skilfully concealed feet, Bouli becomes a low pouffe which looks like it is hovering above the floor. Bouli is also available in a variant suspended on black ropes, creating an impression of floating freely in the air. Bouli furniture is offered as two- and three-seater versions. Multifunctionality and supreme user comfort make the collection a popular choice for public facilities. Designed by the Poznań Academy of Fine Arts UAP.

Clapp

by Noti

Clapp is a furniture family comprising a sofa, an armchair, and tables in two sizes. The collection is a tribute to the best design pieces of the 1960s, especially Józef Chierowski's iconic 366 armchair model. Clapp stands out with its timeless character style achieved through a carefully selected combination of vintage aesthetics with strong modern lines. This expressive form and geometric silhouette tie together to create a memorable design. Depending on the selected upholstery material and wood colour, the collection acquires a different character, fitting into a variety of public, commercial and residential interiors. Designed by Piotr Kuchciński, Clapp is a winner of the prestigious Red Dot Product Design Award 2014.

Comfee

by Noti

Comfee is a collection of armchairs with uniquely shaped and structured seating sections. Innovative design with lightweight seats suspended on a metal frame provides superior comfort of use. A wide range of colour and texture combinations of fabrics, and three types of stitching patterns to choose from in the upholstered version, result in an extensive range of options tailored to different customer preferences. These highlights make Comfee one of the most multifunctional and popular collections. Designed by Anna Hrecka.

Comma

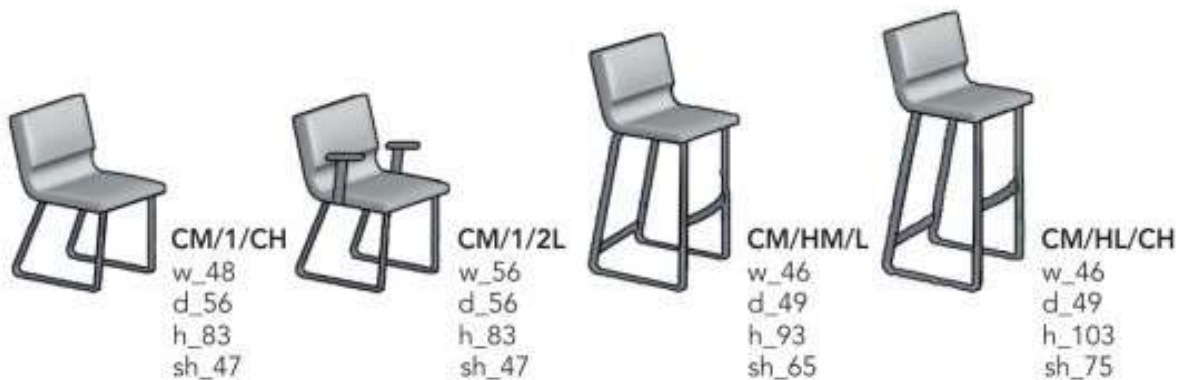

by Noti

The comma is an upholstered chair, which shape - when looked at from the side - resembles a comma, where it takes its name from. Additional armrest can be ordered. It's graphic shape is underlined by the combination of two fabrics - different on the backrest and on the seating. Comma chair was awarded Honorable Mention at the Red Dot Design Award 2009. Designed by Renata Kalarus.

Daaz

by Noti

Daaz is a casual take on one of the best known classical pieces: the Chesterfield sofa. The modular collection was inspired with the curved armrest and backrest shapes. Their contours can be seen here in modern, bold forms. Daaz is a distinct collection designed with a great deal of freedom and grandeur. The seats and the backrests are characteristic for their soft lines. They are comfortable to the point of making you feel hugged. With a great variety of modules, you can freely configure your own set - from something quite small and simple, over to sweeping open bays encouraging everyone to sit and make themselves feel at ease.

Eke

by Noti

Eke is a small chair with a sophisticated design conveying the impression of lightness. The simple shape grabs attention with subtly contoured plywood covered by oak veneer, and carefully designed upholstery pattern. The frame features a distinct structural element in the form of a knot of intertwined bent tubes which engages the viewer with its expressive and forward-thinking design. The Eke range is available in several finishing options for different interior design arrangements. The basic version brings out the natural veneer pattern on the seat and backrest. In the upholstered versions, the soft finish delivers exceptional comfort, making the chair a perfect furniture item for daily use at home or – for example – in restaurants.

Gap

by Noti

Gap is a seating collection primarily for public buildings, offices, hotels and residential settings. The collection, inspired by the design of the 1960s, is characterised by visual lightness and superior ergonomics. The classically shaped silhouette is complemented by gentle lines of the armrests and a uniquely designed seat with ideally balanced proportions. Despite their relatively small size, Gap armchairs and sofas are exceptionally comfortable, and blend well in a variety of interiors.

Hug Me

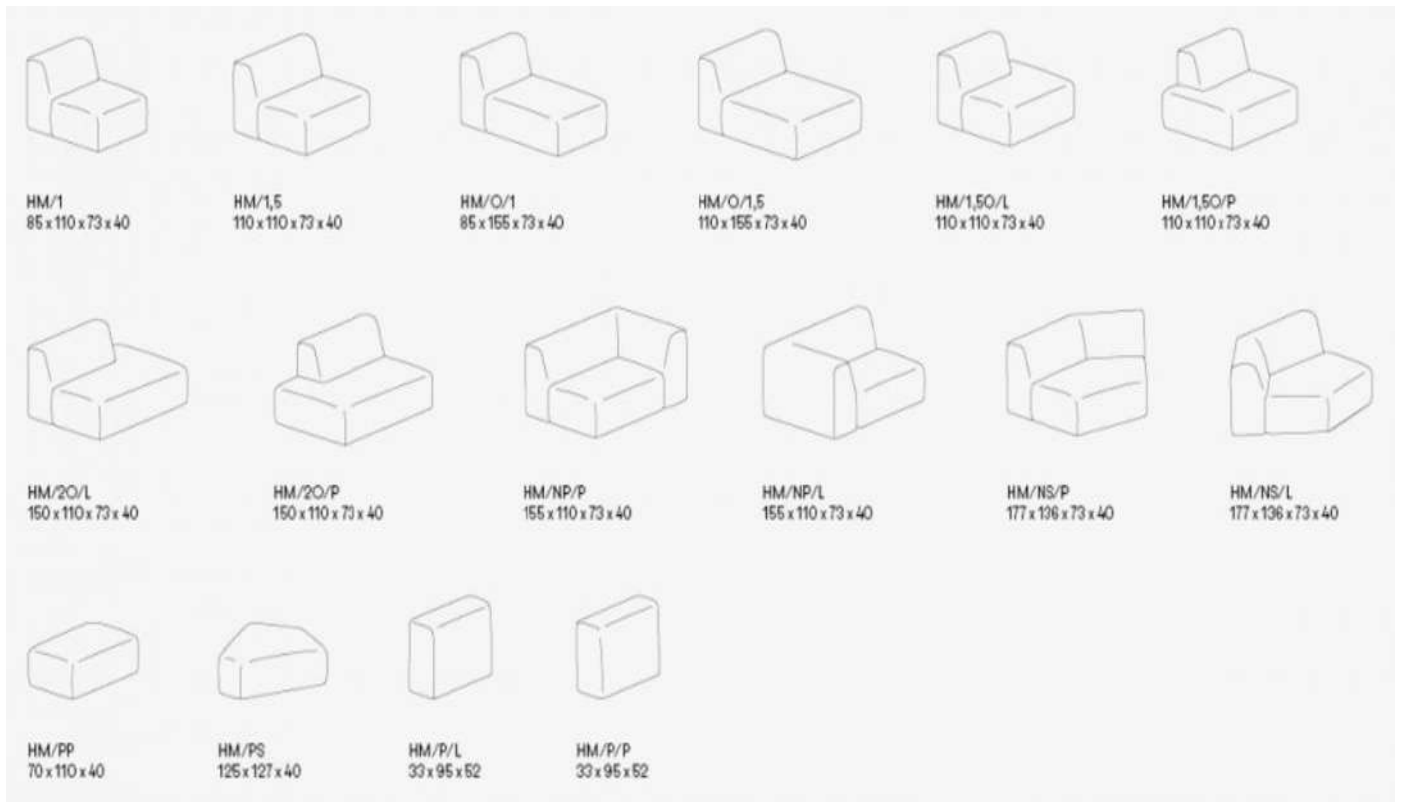

by Noti

Hug Me is a modular sofa wrapped in ultimate comfort. Designed by Pawlak & Stawarski, the collection is based on simple geometric forms of individual modules that can be freely coupled together to create cosy arrangements. The sofa's functionality is combined with a warm, homely feel of each piece, owed to the soft lines made by overlapping layers of fabric. Hug Me is a piece to be comfortably enjoyed, boasting a distinct form that is full of informal and casual style. The diverse forms of each module make it possible to adapt the sofa to different needs and spaces. The available selection of seats can be combined to form a classic corner sofa, an asymmetrical sofa, or an usual, geometrically open arrangement.

Linar Plus

by Noti

Linar is a broad collection of universal chairs based on a simple design. The range offers multiple finish options for the plywood seat - from natural veneer to full upholstery, and a wide selection of bases and functional accessories including armrests and a folding table. With the broad array of options, users are able to select a variant best suited to the functionality and purpose of the interior: offices, residential areas or public utility buildings. Linar chairs have narrow seats, taking up relatively little space, which makes them a superb choice for cafeterias, restaurants and cafés.

Lua

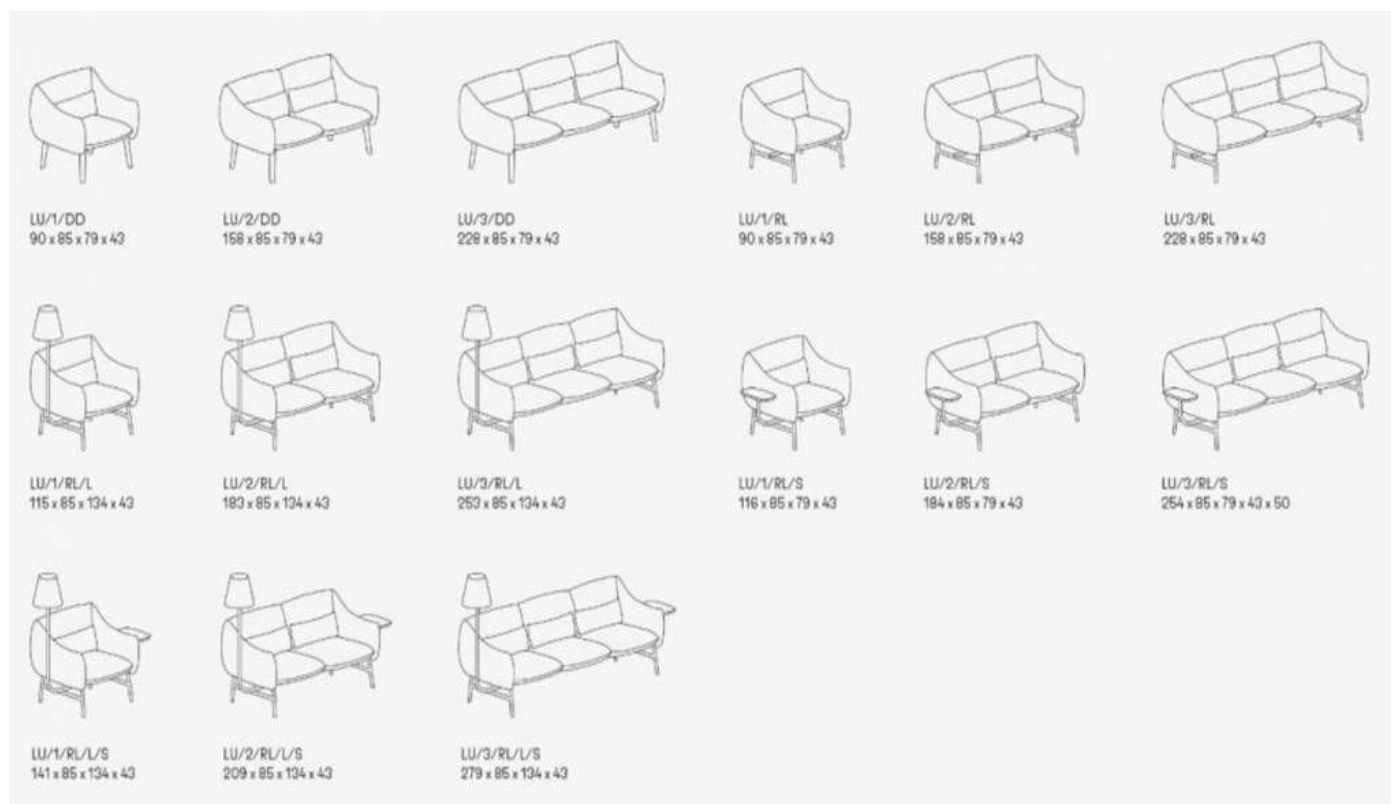

by Noti

Lua is a collection of upholstered furniture which includes an armchair as well as two and three-seater sofas. Elegant simple forms are made of pillows with soft lines. The collection is completed with unique accessories such as a lamp with a lampshade and a table with a wooden top. The accessories are added to the construction of the furniture, constituting its natural continuation. The Lua collection is equipped with two types of bases, made of metal and wood. Wooden legs warm up the image of the furniture, giving it a home-like look.

Mamu

by Noti

Mamu is a very light and compact chair. This piece of furniture can be the focal point of the design, as well as its subtle complement, depending on the selected finishes. It takes advantage of the technological breakthrough in furniture, using moulded fleece for the three-dimensional geometry of its structural ergonomic seat. Mamu is now available with wooden and metal legs - new in collection. Mamu also has a new version with a fully upholstered seat. Mamu perfectly fits in the interiors of modern rooms as an office chair. It will also work well in restaurants and cafes, as well as in home spaces.

Manta

by Noti

Manta is a large family of sofas, armchairs and tables with distinctive shapes inspired by the art of paper folding – origami. The collection features Classic, Lounge and Club lines, and tables with characteristically curved table top edges. Club items are smaller, which makes them a perfect choice for areas where more compact, yet comfortable furniture is needed. Manta Lounge is an armchair with a high, perfectly cushioned backrest finished with side extensions. The sleek silhouette gives the item a unique expression, and well-adjusted height of the backrest ensures comfortable head support. In 2020, the design was refreshed with a new headrest without side extensions.

Mishell

by Noti

Mishell is an extensive line of seating solutions designed for private homes and commercial spaces. A distinct hallmark of the collection is the strongly profiled bucket shape of the seats which provides superior user comfort. The family comprises armchairs with skids, a crosspiece, wooden legs or a swivel version with a metal plate or upholstered with grain leather; XL armchair with a high headrest – with a swivel plate, a crosspiece and wooden legs; chairs – with skids, wooden legs, a crosspiece and casters; bar stools – with skids and a metal plate. Thanks to the rich palette of finish and upholstery colours to choose from, and an elegant form and sophisticated details, Mishell is a universal design that fits in perfectly in home settings, but also hotels or offices.

Mishell Soft

by Noti

Mishell soft is a special version of the Mishell collection designed to provide even more user comfort thanks to an additional, extremely soft quilted layer on the seats. The new version of upholstery has given the collection a more cozy character. It highlights the texture and type of fabric, emphasising the rhythm of the stitching pattern and bringing an eye-catching quality to the design. With a wide selection of fabrics and bases, the elements of the collection can be freely customised depending on the intended purpose of the furniture. Mishell soft is a perfect choice both for home use and public spaces.

Muse

by Noti

Muse is an extensive collection of comfortable modular sofas with a homely feel, comprising armchairs, an ottoman, a recliner and round pouffes, as well as a bench and coffee tables. A distinctive feature of the collection is the soft geometrically shaped cushion in sofa and armchair backrests and armrests, sewn together with the body of the furniture. The seats are placed on legs made of oak wood in a natural colour or black-painted steel. Also available are matching tables of different shapes and heights. In 2020, the collection was expanded by Piotr Kuchciński to include an armchair and a sofa with armrests featuring a steel frame covered in black leather.

Nome

by Noti

Nome is a small-sized armchair. It is an instant attention-grabber with its elegantly tailored form featuring gentle edges and lines. The distinctive shape of the loose backrest cushion with a characteristic horizontal division enhances the ergonomics of the seat and the comfort of the backrest, while giving the armchair an undeniable appeal based on visual clarity. The collection is an excellent choice both for residential areas and public buildings, especially hotels.

Palo

by Noti

Palo is a collection of armchairs capturing an expressive form, with rounded shapes and folds that refers to the lines and structure of the human body. Thanks to the Palo's softness and cosiness, it can allure visitors for some much needed moments of rest during a busy day.

Prism

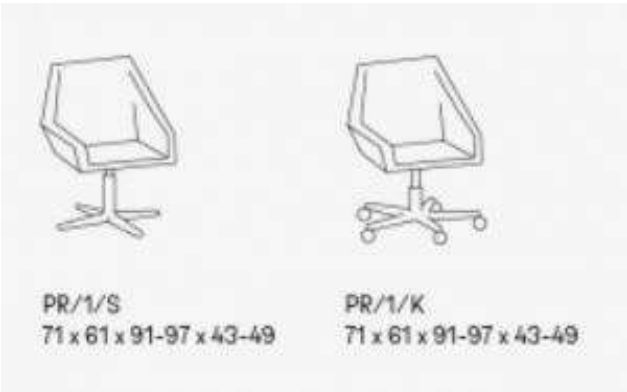

by Noti

Prism is a chair which immediately stands out with its hand-stitching and unique geometric form. All edges on the seat are straight and form polygonal surfaces, with the overall effect resembling the cut on a precious stone. The impression is enhanced by the distinct stitching pattern with multiple crossing straight lines. Prism is manufactured in foam injection moulding technology, which ensures superior quality and long-lasting use. The chair is available in versions with aluminium castors and on aluminium feet. Prism is a great choice mainly for commercial spaces such as offices, hotels or restaurants.

Rosco

by Noti

Rosco is a collection of modular sofas, armchairs and pouffes designed for flats. The horizontal form of low backrests, together with the flawlessly fitting movable cushions, is a distinctive feature of the collection. The shape of the cushions provides not only comfortable back support, but also a wide array of possible arrangements, as the cushions can be moved and rotated. Additionally, the variety of modules ensures the freedom to compose our own configurations of lounge sets. All modules are placed on steel loop legs which complement the form of each Rosco piece. The collection is supplemented by coffee tables with modern design, characterised by 6 cm wide loop legs and frame protruding outside the tabletop. These distinctive details add definition and sharpness to the design. In 2020, Piotr Kuchciński designed a new base for Rosco sofas, placing them on subtle metal legs which make the collection visually light.

Rotor

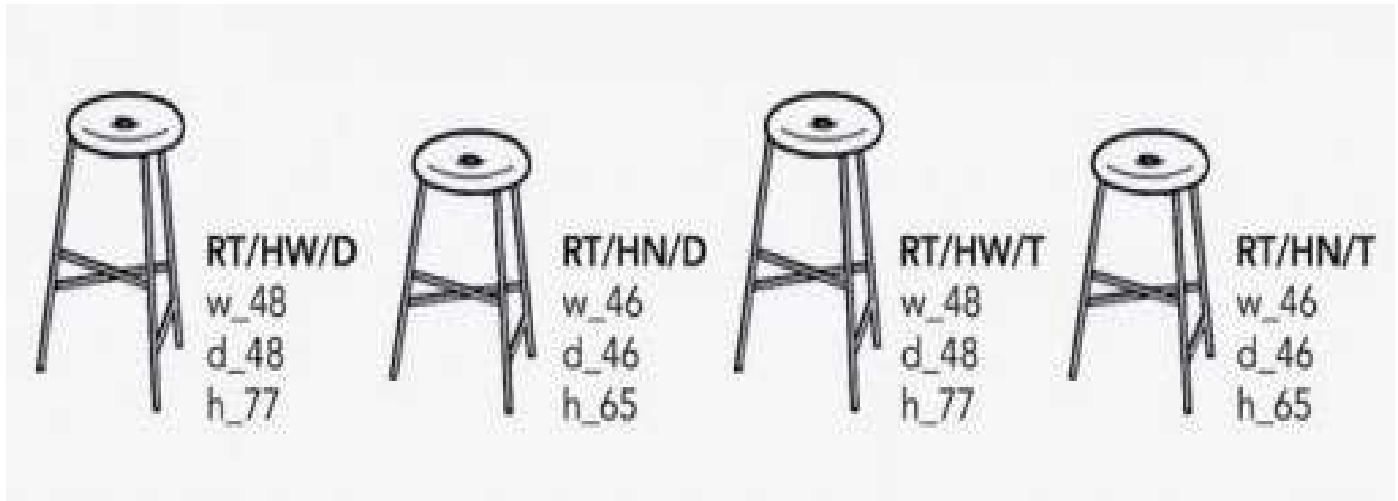

by Noti

Rotor is a collection of three-legged bar stools with a broad range of applications, perfect for residential spaces, hotels, restaurants and food venues, and offices. The most visually distinctive element of the collection is its swivel seat with a central opening for easy grasping and moving the chair. The ergonomic shape with a slightly concave surface and rounded edges creates a uniquely comfortable seating experience. Delicate steel legs are joined together by support slats at three heights to provide a comfortable foot rest. The designer has successfully combined an extremely stable and sturdy design of the steel base with subtle aesthetics. The stools are offered in two heights: 65 and 77 cm. The seat is available in solid oak wooden and soft upholstered versions. Rotor bar stools are available in a wide array of colours of Noti's chart, making it an excellent choice for a broad variety of residential and commercial interiors.

Sheldon

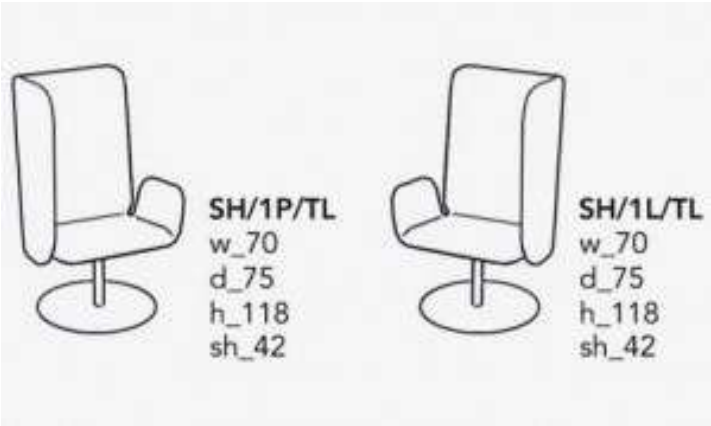

by Noti

Sheldon is a comfortable swivel chair with a unique shape perfect for maintaining individual space in open-plan venues. Sheldon acts like a "shield", partially separating the user from the outside. The high backrest of the chair extends to the side, ensuring privacy and acoustic comfort. The other side remains open, allowing unrestrained contact with the surroundings. Sheldon is a perfect choice for commercial areas, where the focus is on creating a greater distance between work in open-plan premises. It is ideally suited for hotel and corporate interiors: to furnish lobbies, meeting places or rest-and-relaxation areas, creating a safe and comfortable environment. The chair is available in two versions: with high backrest on the right or left side to enable smooth integration into the existing space. The seat, with its tilt and swivel capabilities, adjusts to user preferences, offering superior comfort of use.

Sona

by Noti

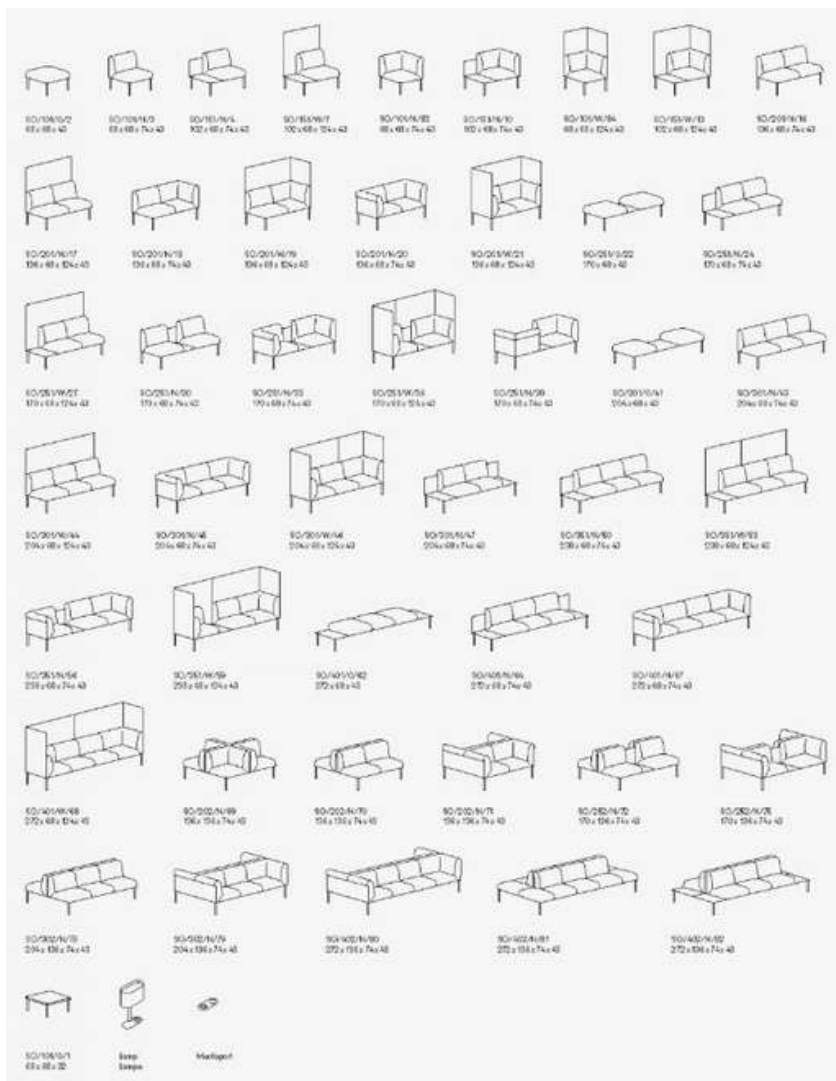

Sona is a modular furniture system whose constituent elements can be freely combined to match the purpose of the building, and the size and functions of the interior. Sona is based on 8 basic frames. Pouffes or small tables can be used to split rows of seats or finish off the final arrangement. A distinct hallmark of the collection are additional panels, available in two heights, which can be fastened to the backrests. Depending on the selected height, they may separate work and rest zones or serve as divider screens which nevertheless preserve the open formula of the sofa or armchair. It is also possible to reverse the modules and, in large islands, join the back supports together at the rear end, forming two rows facing opposite sides. Sona is an ideal solution for creating quiet islands in large open-space offices, also because of the additional functionality of media ports for connecting and charging mobile devices integrated into table tops. A wide selection of Noti textures and colours gives designers an opportunity to separate and highlight individual zones, enhancing or attenuating them with colour.

Tulli Light

by Noti

Tulli light is an armchair model representing the newest addition to the Tulli family. Structurally, it consists of two main elements: a comfortable bucket seat made by applying the technology of rotomoulding, and two stable cross bases. Tulli light – a novel visually lightweight item of office furniture – exudes a friendly and homely vibe. It is a perfect choice for furnishing offices and conference rooms, and the ever-more popular home offices.

Desking

Lopp

by Noti

Lopp is a collection of three uniquely styled and visually consistent products: a desk, a secretary desk, and a dressing table. The defining features of the collection include classic lines, a light silhouette, a minimum of structural elements – and excellent quality. Additional elements enhance the individual character of the constituent pieces. The desk, featuring a handy drawer for all bits and bobs, is the simplest element of the family. The secretary desk has extra containers for office accessories and a hidden hub with USB ports and electric power supply. The dressing table comes with an adjustable mirror and an additional drawer and storage compartments on the table top. The designers Pawlak & Stawarski have successfully combined a timeless minimalist form with functionality and modern approach to design. LOPP is a winner of the IF Design Award in the Product category, and the must have 2019 award at Łódź Design Festival.

Pod

Soundroom

by Noti

SoundRoom is an innovative system of office furniture consisting of dividers, armchairs, sofas, desks, partition walls, and phone booths. This comprehensive design combines an innovative technology based on felt acoustic screens with sound-diffusing geometry based on solutions employed in recording studios. The collection is dedicated to open-office layouts, and provides a perfect choice for furnishing public facilities such as offices, libraries and co-working offices. The system incorporates five basic panels, uniform with respect to dimensions and design, for easy configuration of various seating arrangements. The systemic design allows for unlimited possibilities of spatial and acoustic arrangement of the office area for individual and team work, comfortable meetings and concentration zones. The high acoustic quality of the SoundRoom system has been confirmed in tests conducted at the AGH University of Science and Technology (Faculty of Mechanical Engineering and Robotics, Department of Mechanics and Vibroacoustics) in Cracow, Poland.

Accessories

Serif

by Noti

The canons of classical architecture provided the inspiration for the Serif table collection. With its unique structure and variety of shapes and finishes, the Serif table serves as a real eye-catcher to complement a space. This makes the Serif collection suitable for use in a range of different types of interior designs within domestic, office or public spaces.

Zilenzio

Screen

Arc

by Zilenzio

Arc is a sound absorbing roof to create a feeling of enclosure. Walls and roof together create a defined space within a bigger space. It can be placed freestanding or against a wall, to easily shield off and create a quiet atmosphere.

Kyoto

by Zilenzio

As its name suggests, Kyoto's inspiration comes from the land of quiet contemplation, particularly the beauty of its tearooms. In these special places, the construction of the architecture and clarity of line and form are gently harmonious. Nothing is superfluous, everything serves a clear function without getting in the way of personal interaction. Kyoto's partitions are available in three frame sizes, with two floor drop heights and one width. Frames are in ash.

Zermatt

by Zilenzio

Zermatt a desktop screen that creates privacy without feeling static. The screen's embracing design creates its own spaciousness for better focus. When several desktop screens are grouped, a dynamic and undulating landscape arises through the variation of individual desktop heights. At the same time, the screens dissolve the importance of having all desk heights at the same level to create horizontal lines. The inspiration comes from the aerial perspective and the beautiful layered effect that occurs when the light is dimmed. Zermatt comes both as a rear and side screen in one piece or only as a rear screen and can be adapted to desks from 1200-1800 mm.

Delta

by Zilenzio

Delta Ceiling is a sound-absorbing system floating in the air, like a soft and generous flight of kites. Soft petals or pebbles polished by the waves, Delta Ceiling protects the user from noise while delimiting a space of quietude. It comes in various shapes and finishing, which allow it to be used in very different places, from restaurants to hotel lobbies and libraries. Delta Ceiling is available in three sizes and a variety of fabrics.

Dezibel Divider

by Zilenzio

Dezibel Divider is a sound-absorbing module that can be combined in many ways. The absorbers are suspended separated by 50 or 100 mm. Suspend it from the ceiling to create space separators and effective sound barriers. Dezibel Divider makes it possible to create separate areas and a very pleasant sound environment while preserving the room's openness. Each Dezibel Divider installation is adapted to the customer's specific space.

Fazett

by Zilenzio

The Fazett wall system consists of a single building block, diamond shaped, that can be combined in many ways. By dressing them in different colors you can create many different patterns to cover all kinds and sizes of surfaces. They create a decorative wall pattern that absorb sound at the same time.
